
Host Organization: SORARDI PLC | Project: WorkBridge

Platform

Student: Abdi Abiot (DDU1500744)

Department: Software Engineering (4th Year)

Supervisor: Mr. Busha Dinsa / Mr. Dawit Tesfaye

Duration: March 15, 2026 – July 15, 2026 (16 Weeks)

WEEK 1

March 16 – March 20, 2026 (Month 1)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Company onboarding at SORARDI PLC, team introduction, and development environment setup.	Present t
Tuesday	Node.js v22, pnpm, Git, VS Code, and MongoDB Compass tooling installation and configuration.	Present t
Wednesday	Analysis of WorkBridge marketplace requirements and existing informal Ethiopian labor market friction.	Present t
Thursday	Sprint 1 planning with Lead Software Architect Mr. Dawit Tesfaye; task breakdown and story points.	Present t
Friday	Initial codebase audit, Git repository initialization, and Weekly Sprint Review 1.	Present t

Competencies & Skills Utilized: Agile Scrum, Git workflow, requirements analysis,

toolchain configuration.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 2

March 23 - March 27, 2026 (Month 1)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Scaffolding Turborepo monorepo with pnpm workspaces for apps/client, apps/admin, and apps/api.	Presen t
Tuesday	Designing centralized Data Transfer Objects (DTOs) and TypeScript interfaces in packages/types.	Presen t
Wednesday	Implementing User, WorkerProfile, Job, and Booking schema interfaces with 100% strict typing.	Presen t
Thursday	Building reusable design system components in packages/ui (Button, Card, Input, Modal, Badge).	Presen t
Friday	Tailwind CSS configuration, cross-package linking verification, and Sprint Retrospective 2.	Presen t

Competencies & Skills Utilized: Monorepo architecture, Turborepo, pnpm workspaces, TypeScript DTOs, Tailwind design systems.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 3

March 30 - April 03, 2026 (Month 1)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Structuring Express.js backend (ESM) in apps/api with modular routes, controllers, and middleware.	Presen t
Tuesday	Configuring MongoDB Atlas cloud replica set connection, retry options, and diagnostic logging.	Presen t
Wednesday	Implementing user registration endpoint with Bcrypt password hashing (10 salt rounds).	Presen t
Thursday	Implementing login endpoint with credential validation and sanitization of sensitive data.	Presen t
Friday	Database collection seed scripts and automated testing for	Presen

Day	Engineering Activities & Tasks Accomplished	Status
	authentication endpoints.	t

Competencies & Skills Utilized: Express.js REST API, MongoDB Atlas, Mongoose

ODM, Bcrypt password hashing, seed data.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 4

April 06 - April 10, 2026 (Month 1)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Implementing stateless JWT token generation (HMAC-SHA256) and Bearer token verification middleware.	Presen t
Tuesday	Architecting Role-Based Access Control (RBAC) middleware for jobseeker, employer, and admin roles.	Presen t
Wednesday	Integrating Google OAuth 2.0 authentication with in-memory state store for user role preservation.	Presen t
Thursday	Developing password recovery endpoints (forgot-password	Presen

Day	Engineering Activities & Tasks Accomplished	Status
	and time-limited reset-password tokens).	t
Friday	Security review with industry supervisor, Month 1 milestone sign-off, and Sprint 2 demo.	Presen t

Competencies & Skills Utilized: JWT tokens, Google OAuth 2.0, RBAC authorization, password reset cryptography, API security.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 5

April 15 - April 17, 2026 (Month 2)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Building Next.js 16 App Router worker discovery interface (apps/client/app/browse-workers).	Presen t
Tuesday	Implementing multi-category trade filters (Electricians, Plumbers, Masons, Carpenters, Painters).	Presen t
Wednesday	Developing location-based filtering (Addis Ababa, Dire Dawa,	Presen

Day	Engineering Activities & Tasks Accomplished	Status
	Hawassa) and hourly rate filters.	t
Thursday	Optimizing MongoDB query filters with regex search indexing and pagination support.	Present t
Friday	Frontend state synchronization and weekly standup review.	Present t

Competencies & Skills Utilized: Next.js 16 App Router, React Server Components, MongoDB indexing, complex UI filtering.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 6

April 20 - April 24, 2026 (Month 2)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Designing comprehensive tradesman profile view showcasing trade skills, hourly rate, and badges.	Present t
Tuesday	Implementing dynamic profile editing forms with instant	Present

Day	Engineering Activities & Tasks Accomplished	Status
	image preview and skill tag additions.	t
Wednesday	Developing client overview dashboard	Present
	(apps/client/app/dashboard/employer) with metric cards.	t
Thursday	Building jobseeker overview dashboard	Present
	(apps/client/app/dashboard/jobseeker) with application stats.	t
Friday	Code review with senior frontend developer and peer testing	Present
	across desktop/mobile viewports.	t

Competencies & Skills Utilized: Dynamic form handling, client dashboard design,

profile data modeling, responsive UX.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 7

April 27 - May 01, 2026 (Month 2)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Creating structured job posting wizard in client dashboard	Present

Day	Engineering Activities & Tasks Accomplished	Status
	(title, budget, category, requirements).	t
Tuesday	Building public job board (apps/client/app/jobs) with category pills and search inputs.	Present t
Wednesday	Implementing worker job application flow with modal confirmation and resume/bio snapshotting.	Present t
Thursday	Developing client applicant review desk with shortlist, accept, and decline action buttons.	Present t
Friday	Sprint 5 review, database seeding for sample job postings across Ethiopian cities, and retrospective.	Present t

Competencies & Skills Utilized: Job board architecture, applicant tracking

workflows, database relational references.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 8

May 04 - May 08, 2026 (Month 2)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Engineering direct service booking modal allowing clients to hire tradesmen on demand.	Presen t
Tuesday	Implementing backend booking controller with fields: address, urgency, scheduledDate, offeredPrice.	Presen t
Wednesday	Implementing 6-stage booking lifecycle: PENDING → ACCEPTED / DECLINED → IN_PROGRESS → COMPLETED.	Presen t
Thursday	Developing automated in-app notification triggers on booking state changes in collections.notifications.	Presen t
Friday	Month 2 milestone presentation to SORARDI PLC engineering department and supervisor sign-off.	Presen t

Competencies & Skills Utilized: State machine design, direct booking workflows, event-driven notification pipelines.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 9

May 18 - May 22, 2026 (Month 3)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Analyzing two-sided marketplace business models and defining freemium quota rules.	Present t
Tuesday	Implementing server-side quota enforcement in jobController.js for client job postings (Limit: 3).	Present t
Wednesday	Implementing worker application quota checks (Limit: 5 free applications per month).	Present t
Thursday	Developing structured 403 QUOTA_EXCEEDED error payloads with current usage and upgrade prompts.	Present t
Friday	Connecting frontend quota warning banners and upgrade triggers on /pricing page.	Present t

Competencies & Skills Utilized: Marketplace economics, backend middleware, quota enforcement, error handling design.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 10

May 25 - May 29, 2026 (Month 3)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Designing interactive MockCheckoutModal component supporting Ethiopian payment channels.	Present t
Tuesday	Implementing simulated Telebirr USSD push flow with mobile number input and PIN mock prompt.	Present t
Wednesday	Implementing simulated CBE Birr wallet authorization and bank transfer slip verification flow.	Present t
Thursday	Developing Chapa hosted checkout URL simulator with redirection and mock callback verification.	Present t
Friday	Recording simulated transactions in collections.payments with timestamp, method, and status.	Present t

Competencies & Skills Utilized: Fintech simulation, modal state machines, payment gateway architecture, transaction logging.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 11

June 01 - June 05, 2026 (Month 3)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Developing subscription activation logic in subscriptionController.js updating user tiers to Pro.	Present t
Tuesday	Implementing automated quota resets upon active Pro subscription detection.	Present t
Wednesday	Building bidirectional 1-5 star rating and written review submission upon service completion.	Present t
Thursday	Calculating aggregate worker rating metrics and verified review display on public profiles.	Present t
Friday	Sprint 7 review and full-flow validation of booking completion followed by client review.	Present t

Competencies & Skills Utilized: Subscription management, rating calculations, review integrity, aggregate MongoDB queries.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 12

June 08 - June 12, 2026 (Month 3)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Designing conversational messaging data model in collections.messages with participant arrays.	Presen t
Tuesday	Implementing REST API endpoints (/api/chat/conversations and /api/chat/conversations/:id/messages).	Presen t
Wednesday	Developing ChatService client architecture supporting Socket.io real-time events with REST fallback.	Presen t
Thursday	Building responsive chat sidebar and message bubble window UI (apps/client/app/dashboard/chat).	Presen t
Friday	Month 3 milestone review with industry supervisor and performance benchmarking.	Presen

Day	Engineering Activities & Tasks Accomplished	Status
		t
Competencies & Skills Utilized: Real-time communication design, REST messaging, Socket.io client setup, optimistic UI updates.		
Supervisor Verification: <u>Busha Dinsa / Dawit Tesfaye</u> (Signed & Stamped)		
WEEK 13		
June 15 - June 19, 2026 (Month 4)		

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Scaffolding dedicated Admin Portal in apps/admin using Next.js 16 with separate port 3001.	Presen t
Tuesday	Building administrative user management table with search, role filters, and account suspension.	Presen t

Day	Engineering Activities & Tasks Accomplished	Status
Wednesday	Implementing worker identity verification queue for reviewing national ID and trade certificates.	Present
Thursday	Developing job post moderation desk allowing admins to approve, flag, or remove fraudulent listings.	Present
Friday	Testing role-based admin route guards and dashboard KPI metric cards.	Present

Competencies & Skills Utilized: Administrative software engineering, KYC verification queues, moderation workflows.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 14

June 22 - June 26, 2026 (Month 4)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Developing admin subscription tracking dashboard monitoring mock revenue and plan distribution.	Present

Day	Engineering Activities & Tasks Accomplished	Status
		t
Tuesday	Implementing dispute resolution desk for mediating client-worker booking disagreements.	Present t
Wednesday	Contributing to supporting project LuckyEthio: building responsive UI lottery item cards.	Present t
Thursday	Contributing to supporting project Restaurant QR Menu: touch-optimized category menu components.	Present t
Friday	Contributing to supporting project AxumMarket: optimizing multi-vendor product filter aggregations.	Present t

Competencies & Skills Utilized: Analytics dashboards, dispute management, multi-project full-stack contributions.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 15

June 29 - July 03, 2026 (Month 4)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Executing full monorepo type checking with tsc --noEmit; identifying and fixing typing discrepancies.	Presen t
Tuesday	Configuring ESLint 9 Flat Configs across all packages to eliminate unused variables and any types.	Presen t
Wednesday	Achieving 100% green pass on pnpm check-types (5/5 packages green) and pnpm lint (6/6 packages green).	Presen t
Thursday	Optimizing Next.js 16 production build bundles (pnpm build) and verifying server-side rendering.	Presen t
Friday	Sprint 8 retrospective, automated test suite verification, and code freeze.	Presen t

Competencies & Skills Utilized: TypeScript static analysis, ESLint flat config, build optimization, production readiness.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)

WEEK 16

July 06 - July 10, 2026 (Month 4)

Day	Engineering Activities & Tasks Accomplished	Status
Monday	Exporting Postman REST API collections and documenting all 14 endpoints with request/response schemas.	Present t
Tuesday	Consolidating client, admin, and backend codebases into a clean single Git repository.	Present t
Wednesday	Removing deprecated dump files and drafting root documentation (README.md, setup guides).	Present t
Thursday	Formal software demonstration and deliverables handover to Lead Software Architect Mr. Dawit Tesfaye.	Present t
Friday	Supervisor evaluation, attendance sheet signing with SORARDI PLC stamp, and internship completion.	Present t

Competencies & Skills Utilized: API documentation, Postman collections, software handover, technical communication.

Supervisor Verification: Busha Dinsa / Dawit Tesfaye (Signed & Stamped)
